DecodeLabs Intern Training Program — Batch 2026

Dataset: Order records · **Rows:** 1,200 · **Columns:** 14 · **Tool:** Power Query (Power BI Desktop)

Verification Summary

Every column was audited for missing values, duplicates, inconsistent formatting, and malformed dates before any changes were made.

Check	Result
Duplicate Order IDs / records / tracking numbers	None found
Date format	Already ISO 8601 — no correction needed
Text formatting (categories, addresses)	Consistent — no correction needed
Whitespace, negative or zero values	None found
Total Price = Quantity × Unit Price	Matches on all rows
Missing values	309 blanks found in CouponCode

Change Made

ID	Column	Fix	Status
CR001	CouponCode	309 blanks replaced with " No Coupon " — a blank means no discount was applied at checkout, not missing data, so mean/median/mode was intentionally avoided. Kept in title case to stay visually distinct from real codes (SAVE10, FREESHIP, WINTER15).	Resolved

Verification Gate

Requirement	Result
0% duplicate unique identifiers	PASS
0% incorrectly formatted dates	PASS
